STOP THE MORATORIUM ON MARINE PARKS

Marine parks under siege

In coming weeks, the NSW parliament will consider a Shooters Party Bill for a five-year moratorium on the creation of new marine parks and sanctuary zones within existing marine parks needed to safeguard our oceans for the future.

The NSW government has given its 'in principle' support to this appalling legislation to stop any new marine parks in NSW. It would put a freeze on the vital protection provided by marine sanctuaries for our turtles, dolphins, seahorses and hundreds of other marine plants and animals.

This move goes against the overwhelming scientific and community support for marine parks. These multiple use areas balance fishing in the majority of the park with a series of protected sanctuaries where marine life can breed, mature and grow.

Add your voice today to tell our political leaders you support marine parks.
